DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

EXAMINER'S AMENDMENT/COMMENTS

2. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony H. Handal on 09/27/04. The application has been amended as follows:

In the claims:

Claims 1-6 and 20-32 are cancelled.

REASONS FOR ALLOWANCE

3. Claims 7-19 are allowed. The following is a statement of the examiner's reasons for allowance. The present application relates to an optical system for presenting virtual optical images of an image source outputting light in a forward direction at a desired apparent distance. In particular, independent claim 7 is directed to an optical system comprising a first linear polarizing element, a first elliptical polarizing member, a partially transparent and partially reflective focusing member, a second elliptical polarizing member, all of which are well known from the prior art made of record. However, the present invention is distinguished over the prior art by the reflective-transmissive polarizer configured and positioned to reflect light having a linear polarization in the first direction and transmit light having a linear polarization in a direction transverse to the first direction, and whereby the reflective-transmissive polarizer transmits a third linearly polarized light in a forward direction. The claimed invention is therefore considered to be in condition for allowance as being novel and non-obvious over prior art.

4. The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 USC 102 or 103 would be improper. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Other Information/Remarks

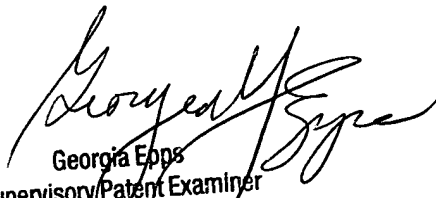

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamanaka (US Patent 5,966,242 and 6,304,303) discloses similar optical devices.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Dinh whose telephone number is 571-272-2327. The examiner can normally be reached on M-F (9:30 AM - 6:00 PM).
